Narrative and Information Section

2021-2022 AUTHORITY BUDGET MESSAGE & ANALYSIS

EVESHAM MUNICIPAL UTILITIES AUTHORITY

AUTHORITY BUDGET

FISCAL YEAR: FROM: JULY 1, 2021 TO: June 30, 2022

Answer all questions below. Attach additional pages and schedules as needed.

1. Complete a brief statement on the 2021-2022 proposed Annual Budget and make comparison to the 2020-2021 adopted budget for each Revenues and Appropriations. Explain any variances over +/-10% (As shown on budget pages F-2 and F-4 explain the reason for changes for each revenue and appropriation changing more than 10%) for each individual revenue and appropriation line item. Explanations of variances should include a description of the reason for the increase/decrease in the budgeted line item, not just an indication of the amount and percent of the change. Attach any supporting documentation that will help to explain the reason for the increase/decrease in the budgeted line item.

Revenues:

As Evesham Township builds out, our reliance on connection fees has continually decreased and this is a continuation of that decreased dependence. As cellular companies merge, the Authority will experience a loss in antenna revenue; thus we are beginning to decrease our reliance on that revenue in anticipation of the loss of cellular leases on our water towers.

Appropriations:

No items on F-4 are 10% or more

2. Describe the state of the local/regional economy and how it may impact the proposed Annual Budget, including the planned Capital Budget/Program. (Example Consider New Development projects such as Housing /Commercial projects impact on the Authorities expenses or revenues)

The local/regional economy is stable and has no real impact on the annual budget.

3. Describe the reasons for utilizing Unrestricted Net Position in the proposed Annual Budget and or Capital Budget, i.e. rate stabilization, debt service reduction, to balance the budget, etc. If the Authority's budget anticipates a use of Unrestricted Net Position, this question must be answered.

The Authority is utilizing its unrestricted net position to provide funding for the maximum allowable appropriation to the Township and to fund capital projects in lieu of issuing debt for smaller projects.

4. Identify any sources of funds transferred to the County/Municipality as a budget subsidy or a shared service payments, pilot payments, or other types of contracts or agreements (Example to provide police services to the Authority etc. and explain the reason for the transfer (i.e.: to balance the County/Municipality budget, etc.).

The Township annually requests the 5% maximum allowable amount in an effort to minimize taxes.

EVESHAM MUNICIPAL UTILITIES AUTHORITY

AUTHORITY BUDGET

FISCAL YEAR: FROM: JULY 1, 2021 TO: June 30, 2022

5. The proposed budget must not reflect an anticipated deficit from 2021-2022 operations. If there exists an accumulated deficit from prior years' budgets (and funding is included in the proposed budget as a result of a prior deficit) explain the funding plan to eliminate said deficit (N.J.S.A. 40A:5A-12). If the Authority has a net deficit reported in its most recent audit, it must provide a deficit reduction plan in response to this question.

The Authority's implementation of GASB Statement 68 and 75 required the recording of the Authority's portion of its unfunded pension liability and other post-retirement employee benefits liability. The Authority was also required to record related deferred outflows and inflows of resources. As a result, the Authority's unrestricted net position ended the fiscal year (Audited) in a deficit (water operations only). If the liabilities were not recorded, the Authority's unrestricted net position would not be a deficit. The Authority will continue to pay its annual contractually required contribution to the Division of Pensions, which contains an amount to fund its unfunded accrued liability and monitor the investments held by the State Division of Pensions in hopes that the liability will decrease and eliminate the deficit. Other post-retirement employee benefits will be paid as required. If or when the Authority is informed that it must pay its unfunded pension liability and costs associated with other post-retirement employee benefits, it will then address how the liabilities will be funded and the impact it will have on its rates. It would best serve the Authority and its rate payers, if the deficit was eliminated over a five to ten-year span.

6. Attach a schedule of the Authority's existing rate structure (connection fees, parking fees, service charges, etc.) if it has been changed since the prior year budget submission and a schedule of the proposed rate structure for the upcoming fiscal year. Explain any proposed changes in the rate structure and attach the resolution approving the change in the rate structure, if applicable. (If no changes to fees or rates indicate (Answer as "Rates Are Staying the Same")

The Authority Board approved a rate adjustment between the water operations and the sewer operations. The base rate for water was increased \$20/qr. because debt service associated with the water operations was increasing and the sewer base rate decreased \$20/qr. because debt service associated with the sewer operations was decreasing. Rate schedule is attached.

Minimum Connection Fee (per unit)	\$3,825.00

A minimum water connection charge for non-residential users shall be imposed, in an amount equal to the residential connection fee regardless of whether the estimated water usage is less than the residential rate of usage.

GENERAL REQUIREMENTS APPLICABLE TO WATER CONNECTION FEES

A. An applicant shall pay a water connection fee for each equivalent dwelling unit at the time that a water permit is requested, in an amount as established by the Authority's Rate Schedule in effect at the time that service is requested. All water connection fees shall be paid in full prior to the issuance of a construction permit for the premises.

B. Connection fees for non-residential users shall be based upon the Authority's calculation of estimated usage multiplied by the rate per gallon per day contained in the Rate Schedule. A minimum water connection fee per unit for non-residential users shall be imposed, in an amount equal to the residential connection fee regardless of whether the estimated usage is less than the residential rate of usage.

C. The projected flow criteria contained in N.J.A.C. 7:14A-23.3 shall be used to determine the estimated water consumption for non-residential uses, whenever practicable. In the event that a type of use is not listed in N.J.A.C. 7:14A-23.3, the Authority shall use its best judgment in determining estimated water consumption. The Authority may adopt additions or exceptions to the flow projections contained in N.J.A.C. 7:14A-23.3 by resolution. For the purpose of this Rate Schedule, any reference to "seat" or "person" in N.J.A.C. 7:14A-23.3 or in any projected flow criteria adopted by the Authority shall be deemed to mean the maximum permitted occupancy established pursuant to the Uniform Construction Code and/or the Uniform Fire Code.

D. In the event that an application is made for water service to a non-residential building or unit for which the types or sizes of the uses therein have not been determined by the applicant, or are subject to change in the future, a connection fee shall be assessed based upon the maximum potential estimated water consumption in the building or unit. The Authority, in its discretion, may enter into a deferred connection fee agreement under which an initial connection fee would be imposed only for those uses that are initially contemplated, and which would defer the payment of the balance of the connection fee until such time as a use for which the initial connection fee was paid is changed to a use that will generate additional water consumption. Any connection fee paid under a deferred connection fee agreement shall be paid at the connection fee rate then prevailing at that time that payment is made.

E. A non-residential user shall be entitled to use the amount of water capacity, in gallons per day, that was obtained through the payment of connection fees, as well as such additional capacity actually used by its building or unit without having undergone a physical or operational change for which a building permit, site plan, subdivision, variance or other municipal approval was required. An application for additional capacity shall be made by any existing non-residential user whenever there is an increase in the estimated, projected water consumption for any existing building or unit resulting from any physical change for which a new connection to the Authority's water distribution system is required. A connection fee shall be charged to the user based upon the increase in estimated water consumption associated with the aforesaid physical or operational change.

F. In the event that an application is made to reinstate water service to a residential structure that was previously abandoned or terminated when the prior structure was demolished or substantially totally destroyed, no additional connection fee shall be due provided that the application for service is made within seven (7) years of the date of the prior termination of service.

G. In the event that an application is made to reinstate water service to a non-residential structure that was previously abandoned or terminated when the prior structure was demolished or substantially totally destroyed, no additional connection fee shall be due, provided that: (1) the applicant has continued to pay water service charges for the property on a quarterly basis as those charges became due, and (2) there is no change in the estimated water usage of the building. In the event that condition (1) herein has been satisfied, but there will be an increase in the estimated water usage of the building, then the applicant shall pay a connection fee only on the amount of the increase in the estimated water usage.

Minimum Connection Fee (per unit)	\$10,223.00

A minimum water connection charge for non-residential users shall be imposed, in an amount equal to the residential connection fee regardless of whether the estimated water usage is less than the residential rate of usage.

GENERAL REQUIREMENTS APPLICABLE TO SEWER CONNECTION FEES

A. An applicant shall pay a sewer connection fee for each equivalent dwelling unit at the time that a sewer permit is requested, in an amount as established by the Authority's Rate Schedule in effect at the time that service is requested. All sewer connection fees shall be paid in full prior to the issuance of a construction permit for the premises.

B. Connection fees for non-residential users shall be based upon the Authority's calculation of estimated usage multiplied by the rate per gallon per day contained in the Rate Schedule. A minimum sewer connection charge for non-residential users shall be imposed, in an amount equal to the residential connection fee regardless of whether the estimated usage is less than the residential rate of usage.

C. The projected flow criteria contained in N.J.A.C. 7:14A-23.3 shall be used to determine the estimated sewer usage for non-residential uses, whenever practicable. In the event that a type of use is not listed in N.J.A.C. 7:14A-23.3, the Authority shall use its best judgment in determining estimated sewer usage. The Authority may adopt additions or exceptions to the flow projections contained in N.J.A.C. 7:14A-23.3 by resolution. For the purpose of this Rate Schedule, any reference to "seat" or "person" in N.J.A.C. 7:14A-23.3 or in any projected flow criteria adopted by the Authority shall be deemed to mean the maximum permitted occupancy established pursuant to the Uniform Construction Code and/or the Uniform Fire Code.

D. In the event that an application is made for sewer service to a non-residential building or unit for which the types or sizes of the uses therein have not been determined by the applicant, or are subject to change in the future, a connection fee shall be assessed based upon the maximum potential estimated sewer usage in the building or unit. The Authority, in its discretion, may enter into a deferred connection fee agreement under which an initial connection fee would be imposed only for those uses that are initially contemplated, and which would defer the payment of the balance of the connection fee until such time as a use for which the initial connection fee was paid is changed to a use that will generate additional sewer usage. Any connection fee paid under a deferred connection fee agreement shall be paid at the connection fee rate then prevailing at that time that payment is made.

E. A non-residential user shall be entitled to use the amount of sewer capacity, in gallons per day, that was obtained through the payment of connection fees, as well as such additional capacity actually used by its building or unit without having undergone a physical or operational change for which a building permit, site plan, subdivision, variance or other municipal approval was required. An application for additional capacity shall be made by any existing non-residential user whenever there is an increase in the estimated, projected sewer usage for any existing building or unit resulting from any physical change for which a new connection to the Authority's sanitary sewer system is required. A connection fee shall be charged to the user based upon the increase in estimated sewer usage associated with the aforesaid physical or operational change.

F. In the event that an application is made to reinstate sewer service to a residential structure that was previously abandoned or terminated when the prior structure was demolished or substantially totally destroyed, no additional connection fee shall be due provided that the application for service is made within seven (7) years of the date of the prior termination of service.

G. In the event that an application is made to reinstate sewer service to a non-residential structure that was previously abandoned or terminated when the prior structure was demolished or substantially totally destroyed, no additional connection fee shall be due, provided that: (1) the applicant has continued to pay sewer service charges for the property on a quarterly basis as those charges became due, and (2) there is no change in the estimated sewer usage of the building. In the event that condition (1) herein has been satisfied, but there will be an increase in the estimated sewer usage of the building, then the applicant shall pay a connection fee only on the amount of the increase in the estimated sewer usage.

PAGE N-3, QUESTION #10

PROCESS FOR DETERMINING COMPENSATION

The Authority has a Salary Administration Plan, which is reviewed annually by the Executive Director and the Director of Finance, Deputy Executive Director. The job positions are compared to similar positions using the American Water Works Association (AWWA) salary survey, similar positions in similarly sized entities using DataUniverse, and comparison of similar positions to those listed in the Occupational Employment Statistics-Bureau of Labor Statistics. In addition, semi-annual employment reviews are conducted by supervisors and management and employees' performance is considered in the salary increase process. The Salary Administration Plan includes minimum, mid-point and maximum salary levels for each position and those ranges are adjusted on an annual basis using one-half of the Consumer Price Index for all Urban Consumers in the Philadelphia-Wilmington-Atlantic City region.

Once the Salary Administration Plan has been updated, the Authority Board Personnel Committee reviews the plan with the Executive Director and ultimately approves the plan for the upcoming fiscal year after all recommended adjustments have been performed.

The Authority does bring in an independent consultant as deemed necessary to review the Salary Administration Plan and make recommendations/adjustments based on their independent study and research. The Authority last utilized an independent consultant in 2015-16 budget year.
