Heritage Village Water Main Replacement Phase III Project Update:

As of June 5th, 2024, all water main installations and connections have been completed in the Heritage Village Phase III water main replacement contract. Currently crews are installing ADA compliant ramps and addressing any concrete repair work that needs to be done. Upon completion of these infrastructure upgrades, milling and paving of the road will begin. The contracted completion date of this project in its entirety is August 25, 2024, at which point Heritage Village will be fully equipped with a brand new, modern water main network designed to deliver and maintain the highest quality water service over the next century, as well as freshly paved roads, keeping the state of the overall infrastructure in Heritage Village current and consistent all while following the NJDEP Water Quality Accountability Act (WQAA) regulatory guidelines. The Authority will have to address two additional roads in the very near future that also need water main replacement. Those roads are all of Heritage Road and a crossing that needs to occur on Walden Road to the opposite side of Main Street. As always, the Evesham MUA appreciates the patience and understanding of the residents of Heritage Village during this process, and we look forward to full project completion. Thank you.

Please don't hesitate to call the Authority with any questions or concerns.

Sincerely,

Jeffrey C Booth
