Cottonwood Drive, Cardinal Court, Sweetgum Court Water Main Replacement Project Announcement

Residents of Cottonwood Drive, Cardinal Court, and Sweetgum Court,

On or about July 8, 2024, the Evesham MUA will begin a water main replacement project on the above referenced streets. Though conditions change during the course of the project, this work is estimated to be completed around December 2024.

The purpose of this project is to replace the aging water infrastructure in this area with brand new, modern water mains and system components designed to deliver and maintain the highest quality water service over the next century, as well as freshly paved roads, keeping the state of the overall infrastructure on Cottonwood Dr., Cardinal Ct., and Sweetgum Ct. current and consistent while following the NJDEP Water Quality Accountability Act (WQAA) regulatory guidelines.

Potential impacts during the construction process while crews are on your street include a brief period of limited driveway access while work is being performed directly in front of your home, general construction noise, short periods of water service interruption while your service line is being connected to the new water main, and the potential for a momentary spell of discolored water after your service line is connected. The Evesham MUA will make every effort to minimize these impacts and will work to resolve any inconvenience to the residents that may arise during this project.

Before the start of the project and throughout the duration, residents will receive correspondence from the Evesham MUA and/or the contractors regarding the anticipated timing of work on your specific street and any special instructions during such time. Additionally, you may visit eveshammua.com/projects for any project news or details. As always, with any questions or concerns, please call the Evesham MUA offices at (856) 983-1878.
